

OPTENERGY

OPTENERGY SYSTEMS

a landmark in the field of buildings'
automation solutions

ABOUT US

In a world rapidly moving towards digital transformation and environmental sustainability, **OptEnergy Systems** has emerged as a landmark in the field of buildings' automation solutions. Established in 2018, the company has a clear vision aimed at redefining the concept of building's automation, operation, maintenance, and optimum usage of energy through innovation and smart technologies. With a team of over 20 years of experience in developing and implementing integrated systems that combine smart building management & energy efficiency, it has become a trusted partner for both the public & private sectors in their journey towards a safer and more sustainable environment.

OptEnergy Systems adopts a comprehensive approach that balances innovation with performance. The company offers advanced solutions to monitor & control buildings, improve air quality, enhance user comfort and safety, and reduce energy consumption and carbon emissions. Thanks to its specialized team and passion for continuous development, the company has built a strong reputation as a leader in those fields, providing a comprehensive range of products, technical solutions, and consulting services that meet global standards and support sustainability goals.

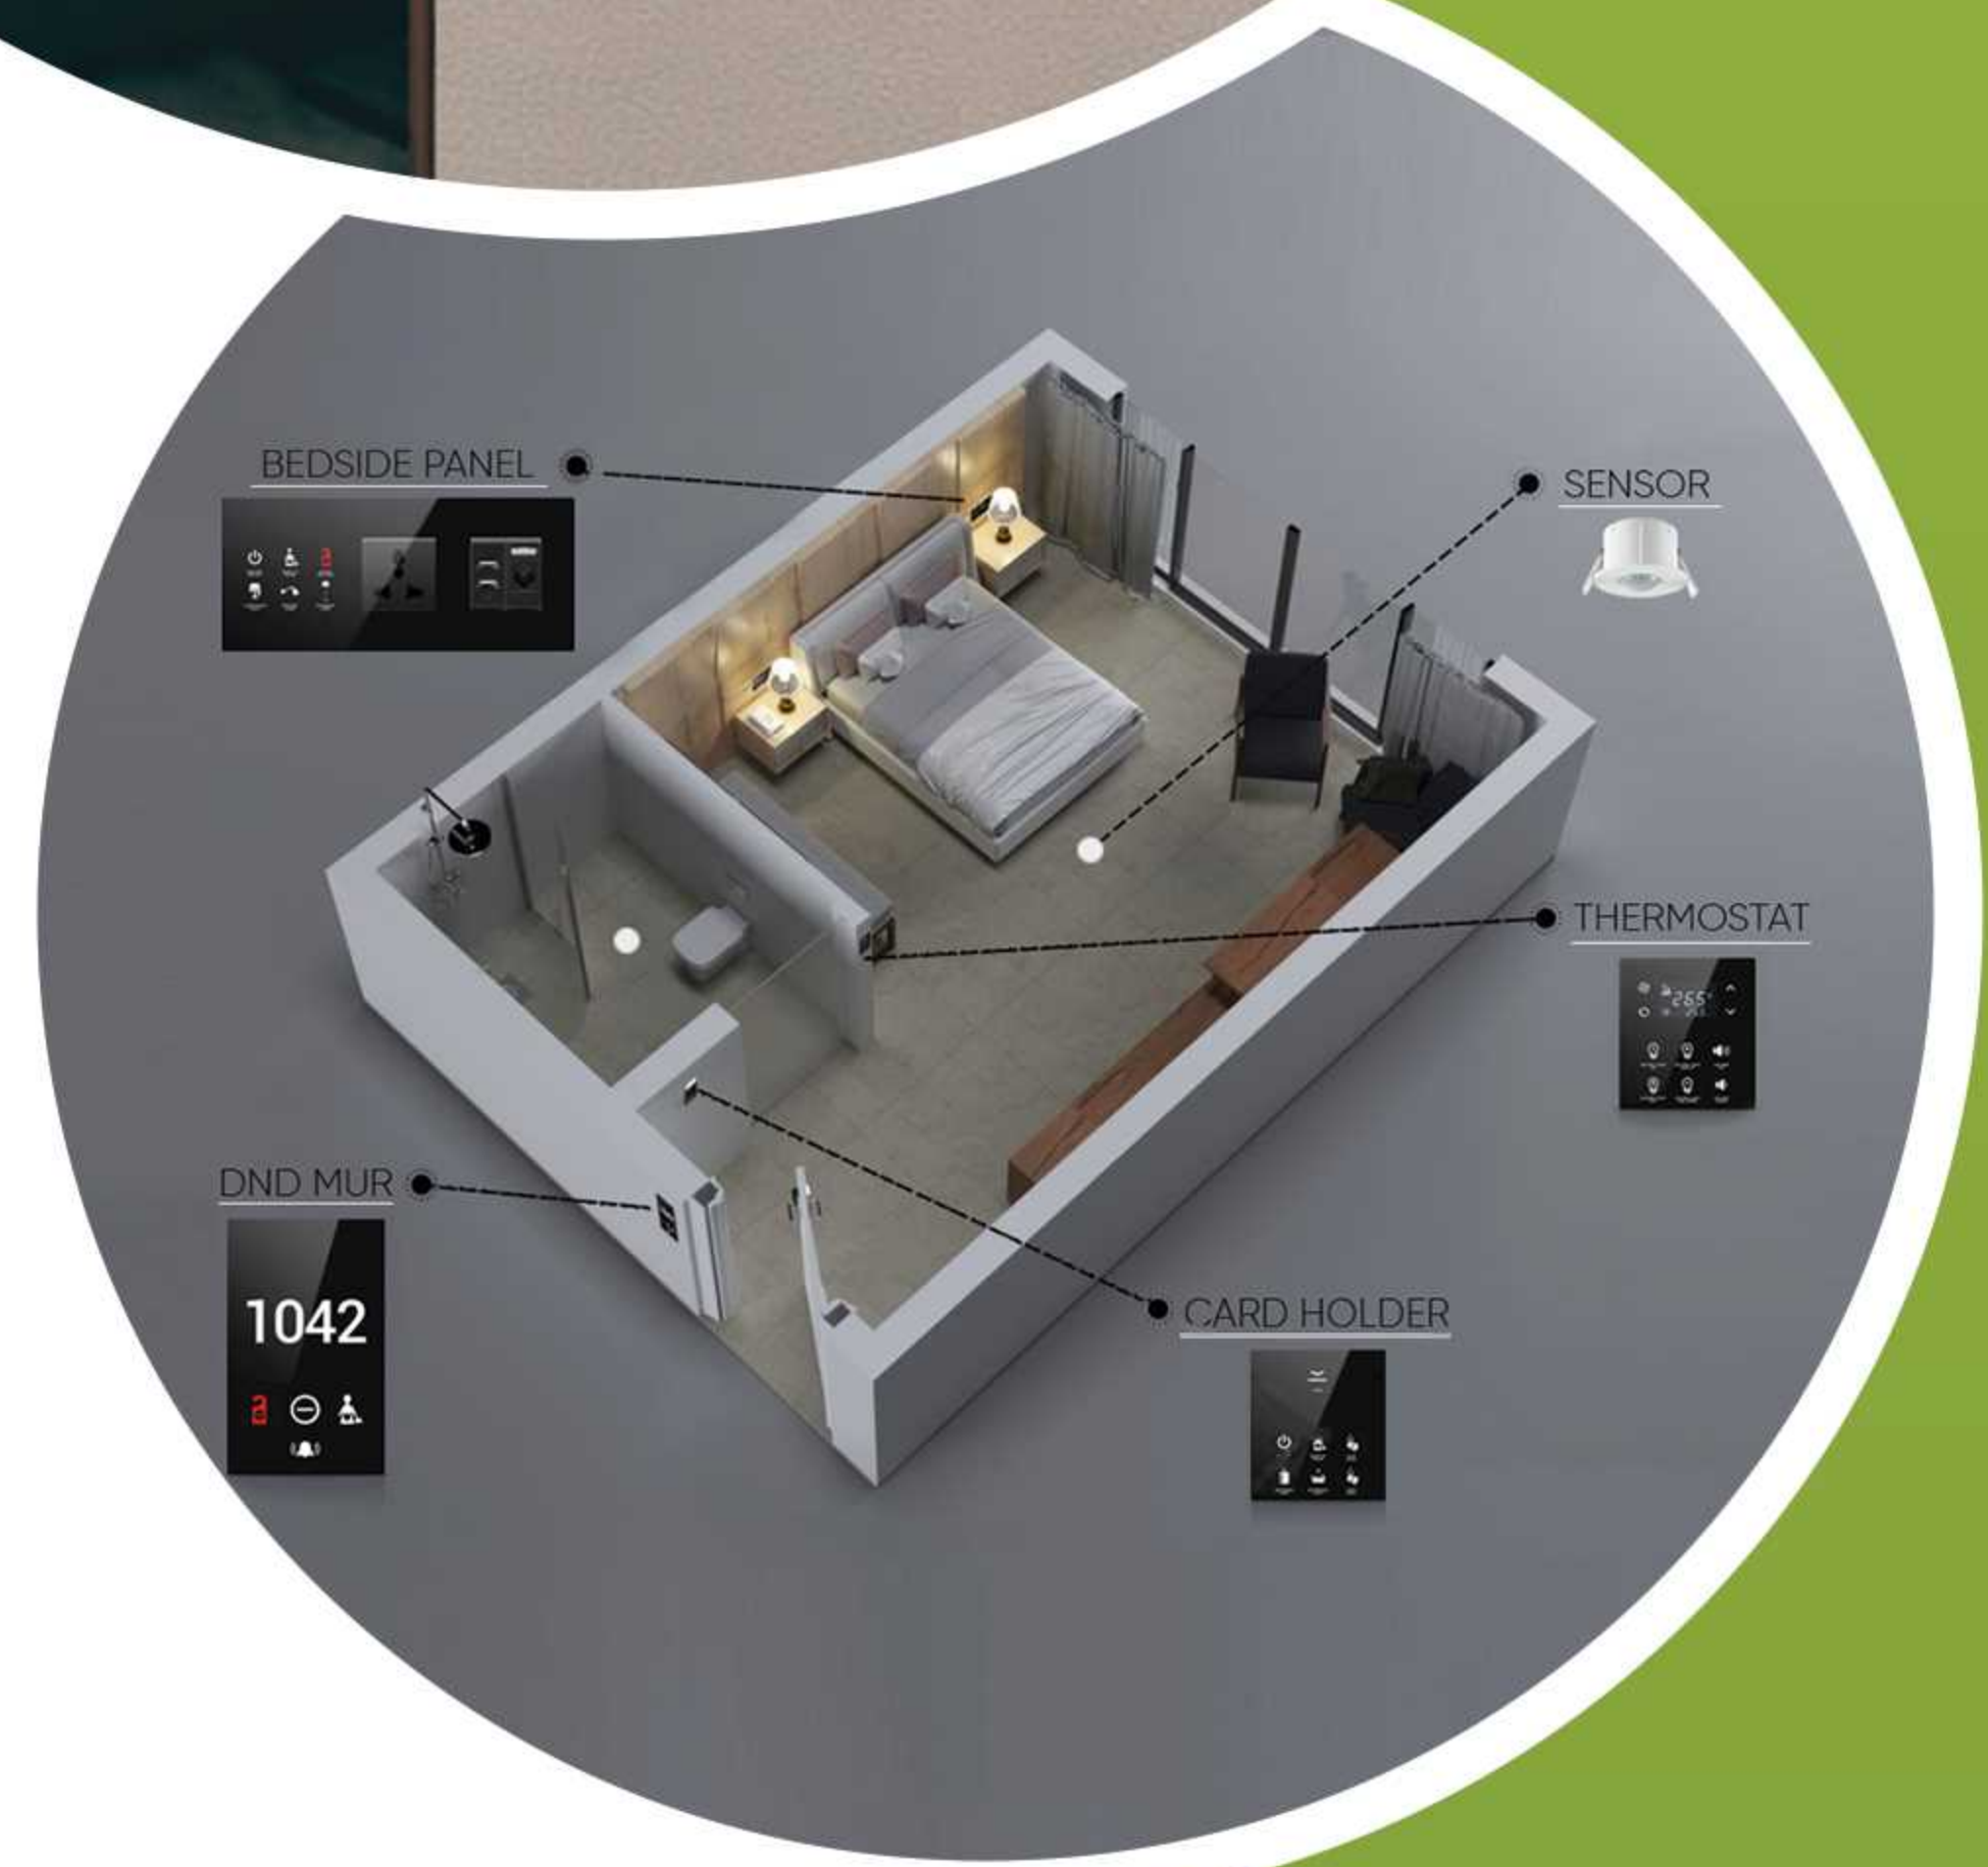

OUR VISION

We aspire to be pioneers in leading the transition towards a future anchored in smart control, operational efficiency, and clean energy, in line with the world's aspirations for sustainable development and a green future.

OUR MISSION

To build partnerships based on trust and credibility with our clients, suppliers, and partners, as we believe that continuous collaboration is the foundation of success and mutual growth.

OUR GOAL

We aim to enhance our presence in Saudi, Gulf and regional markets by developing our services and expanding our network of partners, to become a leading provider of building automation systems and energy solutions.

OUR VALUES

- Transparency and Commitment.
- Environmental Sustainability.
- Safety and Responsibility.
- Continuous Innovation.
- Quality First.

ORGANIZATIONAL STRUCTURE

OptEnergy Systems relies on a workforce of over 40 engineering and technical professionals, working under an organized structure that ensures quality and efficiency under experienced management:

GENERAL MANAGEMENT

MR. YAZAN OGLU

Over 30 years of experience in corporate management and strategic business planning.

SUPPORT FUNCTIONS

Admin, HR, Procurement & Finance

SALES & BUSINESS DEVELOPMENT

ENG. ALI SOLIMAN

Over 20 years of experience in automation and energy solutions (previously worked at Honeywell and Johnson Controls) and holds multiple specialized certifications.

SALES DEPARTMENT

TECHNICAL SUPPORT DEP.

DESIGN DEPARTMENT

PROJECT MANAGEMENT

ENG. MOHAMMED GHANEM

Over 15 years of experience in managing large projects with international companies and holds international certifications in management.

PROJECT EXECUTION DEP.

MAINTENANCE & OPERATIONS CONTRACTS DEP.

OUR PRODUCTS

Building Management System:

BMS - Smart control and monitoring of lighting, air conditioning, energy & security to enhance operational efficiency.

Guest Room Management System -GRMS:

Customized solutions for hotels to manage rooms with ease and comfort.

Fire Alarm & Fire Fighting Systems:

Comprehensive protection based on precise and rapid detection technologies.
also we provide equipments and systems for fire control.

Gas Detection Systems:

Advanced safety solutions for air quality monitoring and leak detection.

Smart Meters:

Accurate monitoring of energy consumption and analysis of operational data.

OUR SERVICES

Systems Integration: Connecting different systems within buildings for comprehensive smart management.

Manufacturing of Electrical & Control Panels (MCCs & DDCs): High-quality control panels for automation and air conditioning systems.

Electrical Installations: Supply and installation of electrical pipes, cable supply and pulling, and field devices installations & terminations

Mechanical Installations (HVAC): Comprehensive execution from supply to installation to operation.

Original Spare Parts: To ensure continued operation, optimum performance, and prolong equipment lifetime.

Planned Service Agreements (PSA): Customized programs for regular & preventive maintenance, as well as maintenance and operation contracts, to maintain system performance & efficiency.

Consulting Services: Energy conservation studies for buildings, including survey visits, recommendations, and implementation of optimization projects for central air conditioning, lighting, pumps, and all technical building systems, aimed at extending equipment lifespan and achieving savings on electricity bills.
